Description:

Premium Precise Optical Lens System, 2-10 times brighter than conventional light

Modular Design, each lens work independently,easier Maintenance

Anti-Glare System, suitable for almost all indoor outdoor lighting

Unique fin aluminium heatsink greatly reduce super bright led light weight andguarantee the safety usage, as well as to avoid the material wastage and the freight.

By increasing the number of fins to enlarge the area of heat dissipation and air flow,this new heatsink significantly increase the efficiency of thermal conduction with less material usage and more saving on energy.

There is hole on all aides of led light ,best to promote the air handlingarea, not only looks beauty,but also steady.

The aluminium alloy material very strong,you even can clean it by high-pressure water gun.
